

## **Current Paediatric Critical Care Training Provision (Network Wide) *Correct as of September 2023***

Paediatric Critical Care (PCC) training is both the responsibility of the provider and the South Thames Paediatric Network (GIRFT 2022). Below is a table of all Critical Care Education provided Network wide for providers to access, with clear definitions of the target audience for each. There are also diagrams for recommended Nursing and Medical staff training.

### **STPN Responsibility**

- Provide appropriate access to PICS-E approved Level 1&2 Course
- LTV course access
- Resources to support local PCC training
- Webinars related to PCC
- Surge planning training
- Reactive training

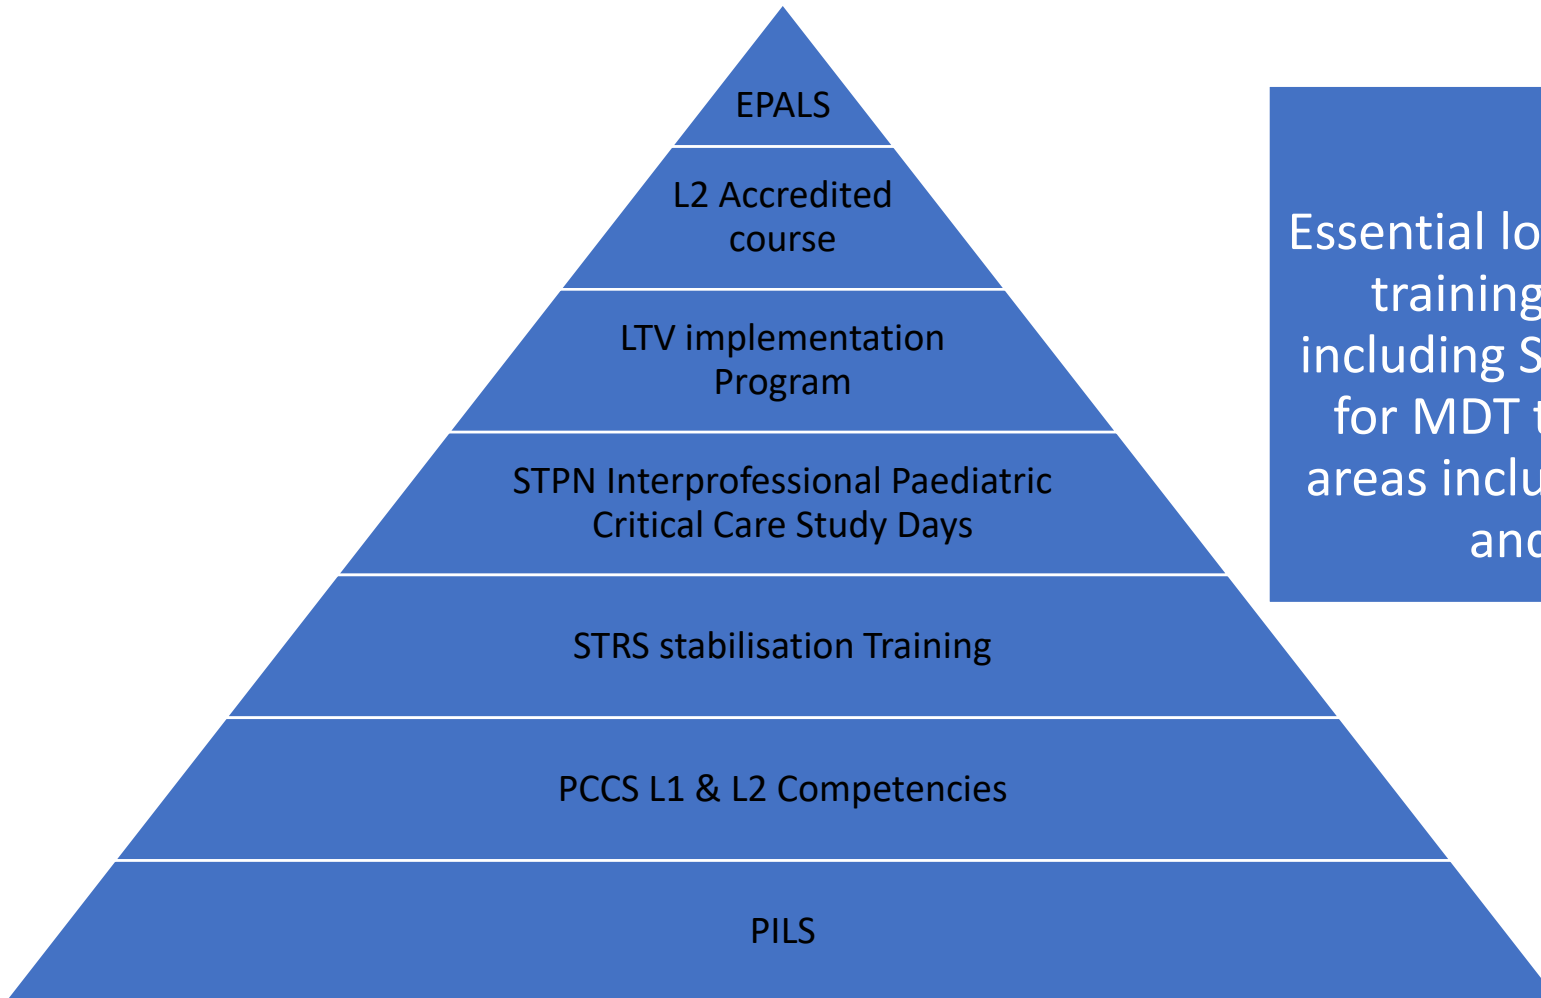

### **Provider Responsibility**

- Access courses appropriately, escalating any concerns to the Network
- Access training provided by South Thames Retrieval service
- Use resources as required and expertise within the providers to run local training and updates including regular simulations and shared learning from events across the Multi-disciplinary team related to Paediatric Critical Care
- Keep an accurate record of training provided and courses attended

Course / Study day / Resource	Provider	Mode	Level	Target Audience	Amount offered	Cost
<b>Education &amp; Resources that Support Paediatric Critical Care</b>						
<b>Paediatric Critical Care Study Days</b>	STPN	Face to Face	L1 & L2	Interprofessional	2 per region	Free. Space to host and some equipment required
<b>Paediatric Critical Care Resources</b>	STPN	Virtual Resources	L1 & L2	Nursing and Medical	<b>Development in progress</b> , intention for educators and PCC leads to be able to use to support in house training	Free to network
<b>Always Learning Together</b>	STPN	Online resource, including webinars	ALL PCC	Interprofessional	As required & resources remain available online	Free
<b>LTV Skills Implementation training</b>	STPN	Face to Face	L2 & Stabilisation	MDT-including Medical, Nursing and AHPs	Per centre, local arrangement between network and centre	Free to network
<b>LTV Guideline</b>	4 ODNS, including STPN	Online	L2 & Stabilisation	All	n/a	Free to the 5 ODNS
<b>LTV Online Resources</b>	4 ODNS, including STPN	Virtual Resources	L2 & Stabilisation	Regional Educators	<b>Development in Progress</b> , Regional education resource	Free to network
<b>'Where there's no PICU'</b>	Eds Program hosted by STPN	Hybrid	Stabilisation L2 & L3	Consultant only: Paediatricians, Anaesthetists Emergency Medicine	TBC	£350 / candidate

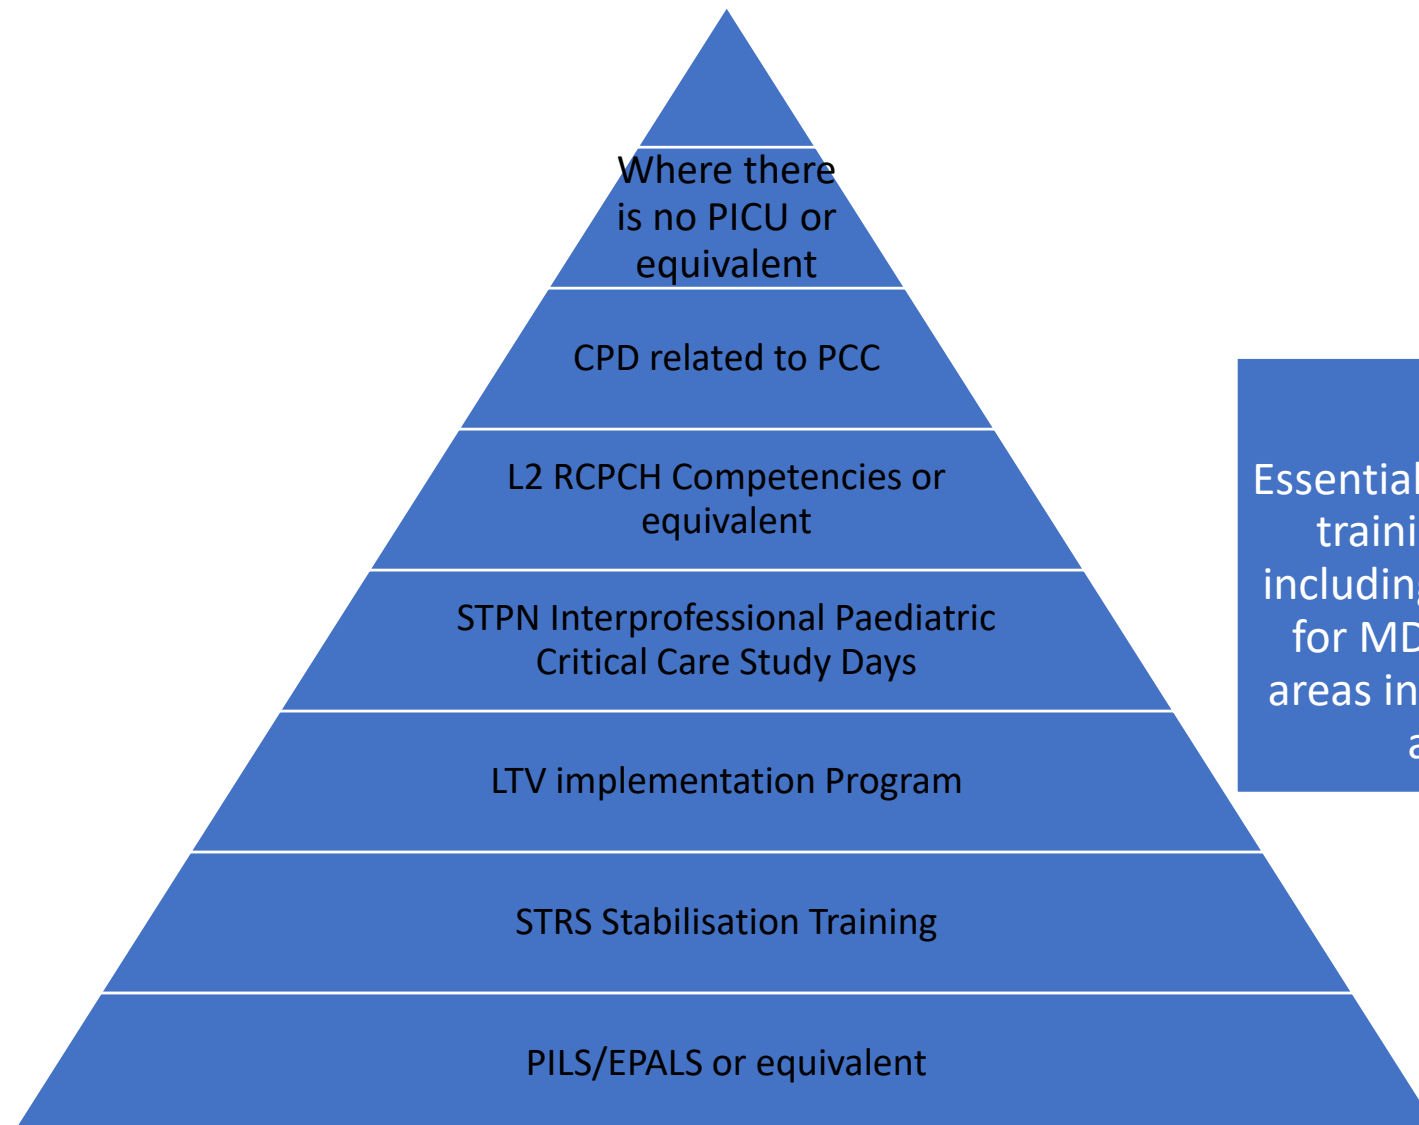

Course / Study day / Resource	Provider	Mode	Level	Target Audience	Amount offered	Cost
<b>PANiCC</b>	Evelina London in collaboration with KCH & RACH	Hybrid	L2	Nurses	2 per year /66 occurrence	£800/candidate
<b>STRS Regional days</b>	South Thames Retrieval Service	Face to Face	Stabilisation	Nurses Only	1 per region (As pilot)	Free to Network, nomination of providers to host required
<b>STRS MDT In-situ Simulation days</b>	South Thames Retrieval Service	Face to Face Simulations at individual Centres	Stabilisation	MDT invite but mainly Paediatricians and Anaesthetists	Per centre, local arrangement between RNPs/Link Consultant and centre	Free, access to facilities and equipment required
<b>STRS MDT regional Simulation days</b>	South Thames Retrieval Service	50 participants SaLL 3 lectures and 4 simulations	Stabilisation	MDT	3 per year	£50 / candidate
<b>STRS online resources</b>	STRS (this may be moved onto our LMS Platform)	Online	Stabilisation	MDT	n/a	Free to Network
<b>EPALS/APLS</b>	All providers	Face to Face	All PCC	MDT	n/a	Variable
<b><u>Train the Trainer programs that support Paediatric Critical Care</u></b>						
<b>Tracheostomy TtT</b>	Evelina Education	Face to Face	n/a	n/a	Variable	£200 /candidate
<b>Central line TtT</b>	Royal Marsden	Face to Face	n/a	n/a	Variable	£30/candidate
<b><u>Recommended Documents that support Paediatric Critical Care</u></b>						
<b>PCCS National L1&amp;2 Competency</b>	National PCCS	Document and Online	Preceptorship L1 & L2	Nurses	Recommended to all trusts by STPN	Free, used as competencies for STPN Recommended L2 course

## Nursing: Essential PCC training recommendations

Alongside:  
Essential local training utilising STPN training resources to support including Simulations and webinars for MDT training across all acute areas including Anaesthetics, AHPs and AICU colleagues

## Medical: Essential PCC training recommendations

Alongside:  
Essential local training utilising STPN training resources as required including Simulations and webinars for MDT training across all acute areas including Anaesthetics, AHPs and AICU colleagues
