

Get involved in the Delphi study

“Developing multidisciplinary standards of care across South London and the South East of England, for children and young people who require management of their tone, caused by spasticity and dystonia”

Hosted by the South Thames Paediatric Network, in collaboration with Evelina London. Funded by Evelina London Charity, on behalf of the Tony Hudgell Fund

Project team:

- Sammy Randall, Clinical Lead AHP, South Thames Paediatric Network
- Dr Dan Lumsden, Evelina Consultant in Paediatric Neurology and Complex Motor Disorders
- Miranda Loveday, Chief Children’s AHP Evelina London
- Sally Watts, South Thames Paediatric Network (STPN) Manager
- Feilim Murphy, Clinical Director for STPN

A consensus-based approach will be used to develop regional standards for Paediatric tone management, by conducting a Delphi Study.

If you would like to take part in the Delphi study, please email:

Samantha.randall3@nhs.net (cc england.stpn@nhs.net) **with your name, professional role and the name of the organisation that you work in.**

We will add you to the mailing list and make sure that you are invited to participate.

Please note that you need to work in the South Thames region (South London, Kent, Surrey or Sussex) and be a professional involved in tone management.

‘Go live’ date:

We anticipate that the Delphi study will be open to participants from October 2025 (subject to change).

More information about the project can be found on our website: [The Tony Hudgell Rehabilitation Programme | South Thames Paediatric Network](#)
